

Design to reality

As of April 20, 2006

A view from the west.

A view of the Lakeside.

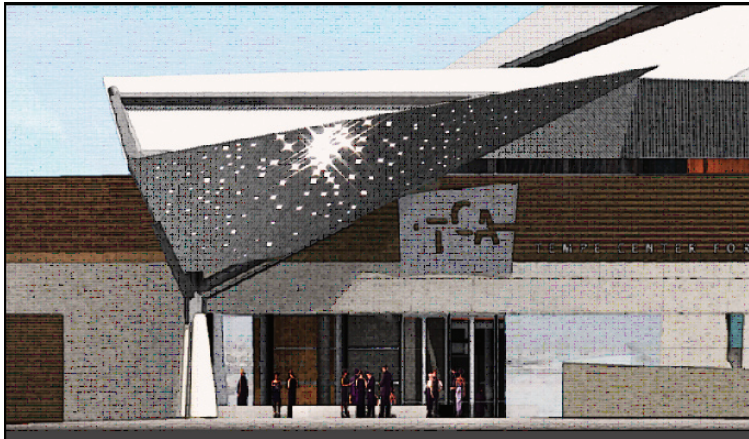

View of the Theater from center stage.

The lobby balconies take shape.

A 64-person Donor Room is located on the second level of the TCA. A 64-person bar sits adjacent to the lobby, just below the Donor Room.

The west entrance will feature a unique marquee with 8,000 marbles of dancing light. Tiny, wind-activated mirrors placed behind the panel of marbles will splash sunlight across the field of marbles, creating a mesmerizing performance.

A 325-space parking lot is forming to the west of the TCA.

A view to the east from TCA (left). An outdoor, lakeside amphitheater - similar to the one in Tempe Beach Park - takes shape in the foreground. The stage area is concrete and the dirt area is being graded for lawn seating.
